Summary

MCA student at Adamas University with basic knowledge of Python, Java, MySQL, and web technologies. Skilled in developing academic projects and eager to learn new technologies. Passionate about problem-solving, software development, and building a strong career in the technical field.

Education

Master of Computer Application

Year of completion: 2026

Institution: Adamas University

CGPA: 7.57/10

B.Sc of Computer Science(Honours)

Year of completion: 2024

Institution: Mahishadal University

CGPA: 7.83/10

Technical Skills

- **Programming Languages:** Python, Java
- **Web Technologies:** HTML, CSS
- **Database:** MySQL
- **Tools:** Git, VS Code, MS Excel

Project

Student Management System

- Developed a School Management System to manage student records, attendance, teacher profiles, and examination results.
- Implemented student module for registration, class allocation, and roll number management.
- Designed an attendance module for daily tracking and monthly report generation.
- Built a result module for marks entry, grade calculation, and performance reporting.

Smart File Organizer

- Built a Python-based Smart File Organizer to automatically sort and manage files by type using file handling and automation techniques.
- Automatically scans a directory and categorizes files (Images, Documents, Videos, etc.)
- Creates folders dynamically if they don't exist
- Handles duplicate files and avoids overwriting

Angle Estimation using RNN, LSTM, KAN, and Traditional Filters

- Developed an orientation estimation system using IMU sensor data for roll, pitch, and prediction
- Compared deep learning models (RNN, LSTM, KAN) with traditional filters such as Complementary and Madgwick Filter.
- Proceed with accelerometer and gyroscope data to improve estimation accuracy and stability.
- Evaluated model performance using RMSE and quaternion error metrics with focus on reducing yaw drift.
- Applied concepts of robotics, navigation systems, and sensor fusion techniques.

Experience

Project Intern

Jun 2025 – Aug 2025

UNIVOLVE CONSULTING

- Worked on software design and database development for 1+ project modules.
- Designed and managed SQL queries for handling 1000+ records efficiently.
- Improved database performance and query execution during project development.

Certificates

- Deloitte Australia – Data Analytics Job Simulation (Forage)
- Build a Data Mesh with Dataplex Skill Badge (Google Cloud Skills Boost)
- Craft Precise Prompts for AI Models (IBM SkillsBuild)

Soft Skills

- Team Collaboration
- Communication
- Time Management
